## About Me

I'm a computer engineer focused in web and mobile development, also a technology and programming enthusiast. Highly motivated and eager to learn (and very quick at doing so).

I'm passionate about my career. I take my projects very seriously with attention to detail and conformation with today's best practices. I adore writing clean and efficient code which can be read by any developer with ease.

I also have a bit of an eye for design. I love crafting layouts for websites and applications. I like visually well composed applications bursting with great usability patterns and adherence to current tendencies.

## Work History

**LA FUENTE DIGITAL**  
**Web Developer and later Lead Developer**

02.2015-08.2015

Joined the team with the job of the creating the company's website and to craft beautiful and cohesive websites for their clients.

Later became the Lead Developer and continue the labor of the creation and design websites with the addition of developing a strong sense of leadership and good communication with my team.

With my background on Linux development I made my way to DevOps and to design modular and complex infrastructure for world class applications.

**VICSON BEKAERT**  
**Software department Intern**

11.2013-02.2015

Development of software for managing the company phone book under web environment.

Development of software for controlling printers counters in the network company forecasts and estimates involving pricing, billing expenses and by providing a simple graphical view for the senior management.

Representing Vicson Venezuela as innovation projects in the Bekaert annual awards.

IT support to users of the two company's establishments VESJO and VEVAL.
